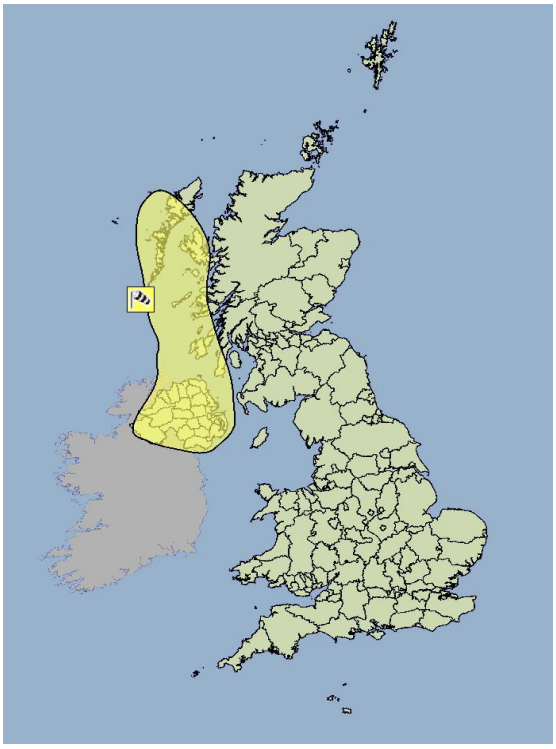
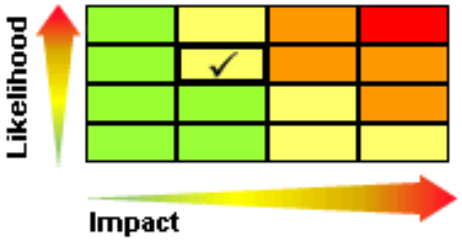
National Severe Weather Warning Service





Chief Forecasters Assessment
The south to southeasterly winds will strengthen across the west of Northern Ireland towards midday, then further east through the afternoon, before easing from the west by early evening, when severe gales will still be affecting parts of western Scotland. The strongest wind gusts are likely over and to the north of high ground, and in coastal areas exposed to this wind direction.

The Met Office have issued a **Yellow Warning** of **Wind**

Valid from **11:00 on Mon, 06th Feb 2017** until **22:00 on Mon, 06th Feb 2017**

It will become very windy through this afternoon. Gusts of 50-60 mph are expected widely with isolated gusts of 65 mph in the north of Northern Ireland and in exposed coastal districts, whilst 70-75 mph gusts are likely in the Western Isles.

Some disruption is possible to road, air and ferry transport, whilst localised power interruptions are possible.
